

LVEF: matched modality performance

PENDING — template only; no model results have been inserted.

Modality	Test n	MAE [95% CI], EF points	RMSE	Error $\leq$ 5	Logistic <40 AUROC
Vision only	PENDING	PENDING	PENDING	PENDING	PENDING
Structured only	PENDING	PENDING	PENDING	PENDING	PENDING
Early fusion	PENDING	PENDING	PENDING	PENDING	PENDING

Continuous MAE is the primary anchor. Separately trained logistic AUROC is the primary binary metric.
Model-specific intervals do not establish paired superiority. Calibration reuses validation after selection.
