

LVEF: paired fusion effects

PENDING — template only; no model results have been inserted.

Fusion — vision

PENDING paired effect and interval

Fusion — structured

PENDING paired effect and interval

Fusion minus comparator MAE, EF percentage points · negative favors fusion

Paired subject bootstrap; fixed fitted models. Core Holm family contains all four LVEF + strict-panel claims.

Dashed ± 1 EF-point guides, when populated, are expert-inference research margins, not MCID or clinical equivalence.
